PROFILE

9+ years at BMW turning enterprise data and LLMs into practical tools. Experienced in AI enablement, validating models, and ensuring complex tech solves real business problems instead of just gathering digital dust.

WORK EXPERIENCE

Digitalisation Specialist

2024 - Present

BMW AG | Munich, Germany

- Drove business-side AI transformation by building high-impact use cases, reducing development time by 90% and costs by 95%.
- Coordinated AI enablement and transformation initiatives within Indirect Purchasing, identifying high-value business processes and use cases for AI adoption.
- Served as the primary interface between procurement stakeholders and AI development teams, translating business requirements into functional use cases, evaluation criteria, and actionable feedback.
- Designed and executed business-driven LLM evaluation using Golden Questions and procurement scenarios to validate AI outputs and improve model reliability.
- Created Celonis Knowledge Models, Meta Objects (CBW queries), and standardized reporting requirements for supplier profiling and analytics.
- Developed Python validation scripts and automated regression checks, reducing testing effort from days to hours across 18 capturing systems.
- Built Power BI dashboards and established data quality assurance processes to ensure integrity, traceability, and robust test governance.

EDUCATION

Master of Science in Automotive Embedded Systems

ESIGELEC

Rouen, France

2014-2017

Master of Engineering in Automotive Embedded Systems

Manipal Institute of Technology

Karnataka, India

2014-2017

Bachelor of Engineering in Computer Science

VTU

Karnataka, India

2009 - 2014

LANGUAGE

- English: Fluent
- German: B1

Work Experience (CONT.)

IT Quality Specialist
2017 – 2024

BMW AG | Dingolfing, Germany

- **SAP BusinessObjects / Enterprise Reporting:** Developed and maintained complex BO universes (IDT) for enterprise reporting. Automated threshold extraction from Oracle Databases, streamlined report development to reduce turnaround time by 70%, and supported ~5,500 daily report instances.
- **Palantir Foundry & Amazon QuickSight:** Contributed to proof-of-concept projects by building near-real-time interactive dashboards, implementing data-governance standards, and setting up threshold-based anomaly alerts.
- **Oracle APEX:** Successfully rolled out an enterprise application to 17 technologies and over 2,000 users globally, managing international maintenance and upgrades.

Software Developer intern
2016 – 2017

BMW AG | Dingolfing, Germany

- Designed a quality-management portal using APEX, Oracle Database, and PL/SQL with real-time KPI retrieval.
- Modernized legacy QCockpit reporting tools into a real-time application using Java EE, GlassFish, and PostgreSQL.

Web Developer
2014 - 2015 & 2011 - 2012

WebNock | Karnataka, India

- Designed responsive websites and content-managed solutions using Drupal, HTML and JavaScript.
- Managed hosting, maintenance, performance and security while translating customer requirements into reusable web solutions.

Digital Skills

AI & Data: LLM Evaluation | AI Use Case Design | Foundation Models | Data Governance | Knowledge Modeling | AI Testing | Supplier Analytics | Enterprise Data
AI Delivery: Stakeholder Management | Requirements Engineering | Test Strategy | Acceptance Criteria | Cross-functional Collaboration
SAP & Enterprise: SAP CBW | SAP BusinessObjects / IDT | Oracle | SRM | Coupa
Analytics & Platforms: Power BI | Celonis | Palantir Foundry | Amazon QuickSight | Tableau | AWS
Development: Python | SQL | PL/SQL | Oracle APEX | PostgreSQL | HTML | CSS | JavaScript

HOBBIES

- Badminton
- Cycling
- Travelling

STRENGTHS

- Time Management
- Discretion
- Clear Communication
- Problem Solving
